

Gabriel Abreu

Full-Stack Software Developer

Blumenau, SC, Brazil | gabriel.roberto.abreu@outlook.com.br | grabreu.dev
linkedin.com/in/gabriel-deabreu | github.com/grabreu

Summary

Software Developer with 6+ years building and maintaining full-stack applications with .NET and React, primarily in logistics and cloud environments. Worked on products used across Brazil, Latin America, Canada, and Africa. Open to remote and international opportunities.

Skills

Languages: C#, TypeScript, Python, SQL

Backend: .NET, ASP.NET Core, SQL Server, PostgreSQL, MongoDB

Frontend: React, TypeScript, Astro, Tailwind CSS

Cloud and DevOps: Azure (App Services, Functions, DevOps), Docker, Kubernetes, Cloudflare Workers, GitHub Actions

Testing and quality: xUnit, Testcontainers, Vitest, Karma/Jasmine, Cypress, SonarQube, Datadog, Snyk, Apiiro

Experience

Software Developer, Ambev Tech – Blumenau, SC, Brazil May 2020 – Apr 2026

- Built and maintained backend and frontend features on logistics products (.NET, React) covering management, reporting, factory-floor, production, and delivery workflows.
- Contributed to architecture and technical design decisions, UML and solution diagrams, technical refinements, code reviews, and prioritization of technical initiatives.
- Handled regional differences through localization, feature flags, and country-specific business rules, working with teams and stakeholders in Portuguese and English.
- Handled production incidents and war rooms (logs, metrics, root cause analysis, hotfixes); tracked Apdex, MTBF, MTTR, test coverage, and SonarQube.
- Worked with CI/CD in Azure DevOps, including pipeline migrations and multi-region deployments.
- Troubleshoot build and deployment problems; addressed Snyk and Apiiro security findings.
- Used Azure App Services, Azure Functions, Docker, Kubernetes, Datadog, MongoDB, and SQL Server.
- Built unit, integration, API, and E2E tests with xUnit, Testcontainers, Vitest, Karma/Jasmine, and Cypress.
- Used Claude in the company's AI-assisted development workflow, including code review and documentation.
- Onboarded developers through product and architecture walkthroughs, environment setup, pair programming, code reviews, documentation, and support videos.

Application Support Intern, Ambev Tech – Blumenau, SC, Brazil Jun 2019 – May 2020

- Provided technical support for logistics systems via Movidesk, investigating issues in the applications and through SQL queries.
- Worked with PostgreSQL (SQL queries, stored procedures, scripts used in BI integrations), troubleshooting issues and applying fixes.
- Performed root cause analysis, escalated incidents, and tracked SLO and NPS metrics for the team's service quality and response targets.
- Documented and forwarded user feedback and improvement requests to the responsible teams.

Projects

desfecho: Result pattern for .NET with ASP.NET Core integration, on NuGet. github.com/grabreu/desfecho

aduana: Type-safe fetch client for TypeScript with interceptors and RFC 7807 error parsing, published on npm. github.com/grabreu/aduana

ramus: Cross-platform tree-style CLI in Python, published on PyPI. github.com/grabreu/ramus

slug-pages: Anonymous scratchpad running entirely on Cloudflare Workers and D1. slug-pages.grabreu.dev

Education

Cruzeiro do Sul Virtual , Bachelor's in Management Information Systems	Blumenau, SC, Brazil 2019 – 2022
---	-------------------------------------

Instituto Federal Catarinense , High School & Technical Diploma in Information Technology	Blumenau, SC, Brazil 2016 – 2018
